

NOVA

PRODUCT NAME:

NOVA

Our new Nova ultra-high gain 3D/2D screen will give movie-goers an unforgettable experience.

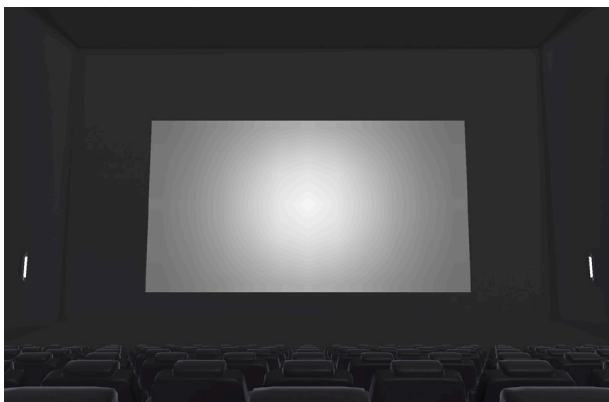

Exceptional image quality, made to last.

A completely new surface coating, Nova creates an unrivalled viewing experience both in 3D and 2D. The in-built technology and screen coating adds optical clarity and sharpness to images to help showcase movies as the Director intended. We've also integrated Nanolast™ Technology, for longer lasting screen durability and performance.

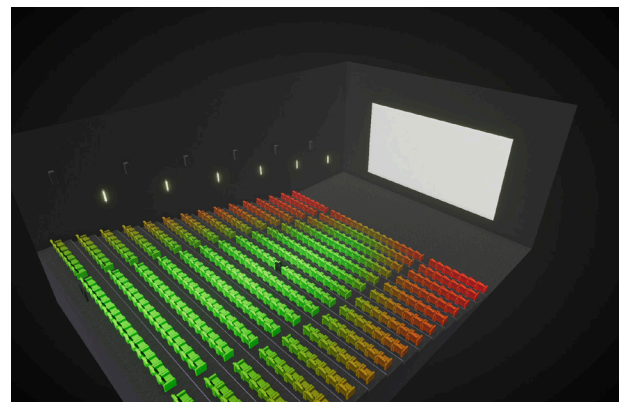

Features and Benefits

- Breathtaking image quality
- Additional optical clarity and sharpness
- Ultra-High Gain with no additional hot-spotting
- High extinction ratio for an unparalleled 3D performance

N310

Brightness uniformity

Light distribution

Gain: 3.1

Extinction ratio: 280:1
