Crystal 140, 180, 220
2D / Pearlescent Screen

Crystal 140, 180, 220

Crystal screen presents realistic image through color sensitivity, contrast, and brightness. It could make people enjoy the picture without hinder of light and any angle with any location in a cinema theater. Light itself has no specific color, but when it reflects subject and that appears natural color.
The lights are reflected on Crystal screen, can be displayed its vividness, brightness, and purity.

크리스탈 스크린은 선명하고 부드러운 영상을 제공하며 넓은 시야각으로 어느 위치에서나 같은 느낌으로 영상 관람을 할 수 있습니다.
