

# Severtson Screens Matte White

**Severtson Matte White (MW)** is an optically-coated screen surface, which offers a more uniform image, reflecting colors that are true to the original content. Matte White offers bright, beautiful images while maintaining contrast, making it the perfect solution for low-light situations when paired with modern projectors.

Amazing contrast, excellent color reproduction, and fantastic viewing angles combine to make it the ultimate cinema screen. Its unique, water-based coating is engineered to protect and prolong the life of the screen material while maintaining its original gain, making it the best value screen on the market.

## Technical Specifications
